

PERGO[®]
FLOORS FOR REAL LIFE

Durability x 2!

Choose a floor that is as good for the interior as it is for the exterior that we all share.

Durability for the long run

At Pergo, durability is not limited to our products. It extends into our production process and influences how we protect our shared environment. To make it simple: When you choose one of our floors, you should feel safe in the knowledge that it has been produced using a minimum of resources.

To minimise our footprint we recycle whenever and whatever we can. 80% of the content of our products consists of wood surplus from the wood industry. We use only renewable wood products such as pine and spruce never exotic woods or wood from rainforests that are threatened with extinction.

We were also the first flooring manufacturer to ever achieve the official Nordic Ecolabel, the Green Swan, certifying that our products are a good environmental choice.

Another environmental advantage of Pergo laminate floors is the high amount of thermal energy that can be extracted when burned at waste incineration plants. We use this property to increase the energy efficiency of our own operations, recycling all wood waste from our milling and sawing processes to heat our production facilities.

Environmentally responsible, beautiful and long-lasting that's Pergo durability.

Information sur le niveau d'émission de substances volatiles dans l'air intérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions).

WOOD PARQUET

Get to know wood

Wood is a material that offers natural variety in the way it looks and feels. On top of that, it's also easy to change and modify by choosing different surface treatments and finishes. So when you look for a wood floor, there are a lot of aspects to consider.

Do you prefer the smooth looking walnut floor or a ragged look with visible knots and cracks? Is a low-maintenance lacquer surface protection for you, or do you prefer an oiled floor that can be refreshed or repaired easily? And what about bevels and different formats? In our collection you'll find floors to suit a wide range of styles and preferences.

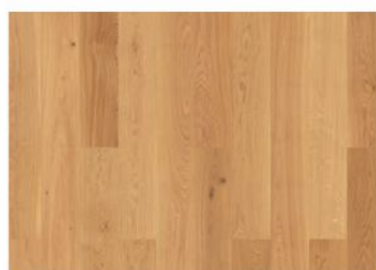

WOOD PARQUET

Choosing a wood floor

When you go looking for a wood floor you're faced with a lot of choices. Because wood is not only a material that offers a wide variety of natural looks, the variety is increased even more by different surface treatments and finishes. In this brochure you will find a wide range of wood designs. Take your time choosing between the different options to find the floor that is right for you. And when you're ready we advice you to visit your nearest dealer to experience your choice first-hand. Because the tactile beauty of a wood floor makes for a great look, but an even greater touch.

Grading

Each tree is unique, and even different parts of the same tree produce different appearances. Knots and grain patterns help define and add character. Some of our products have more character than others, and that is why we have developed a grading system to help you find the floor with the expression you want.

Selected

Wood with knots up to 20 mm; variation in colour and structure.

Accent

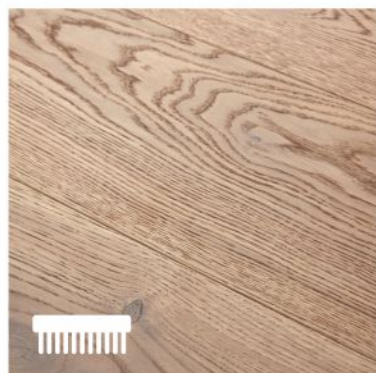

Wood with knots up to 50 mm; lively variation in colour and structure.

Lively

Wood with big knots up to 80 mm and cracks; lively variation in colour and structure and a rather rustic appearance.

Structure

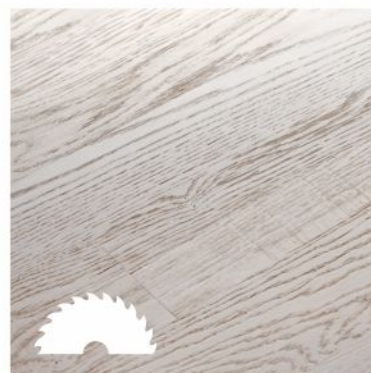

Brushed

Brushing the surface of a wood plank accentuates the natural grain structure, and enhances the authentic look and feel of the wood.

Deep brushed

The wood surface is treated with special brushes, brushing down the soft parts between the annual rings. Deep brushing enhances the natural wood feel even more.

Sawcut

The random marks of a saw cut surface really show off the craftsmanship and character of the wood planks, and add a genuine feeling to the room.

WOOD PARQUET

Finish

Wood is a material that truly grows more beautiful with time. And to ensure that you may enjoy your floors for many years to come, our floors are given a protective and caring surface finish. All our floors are ready for use right out of the box, with no extra surface treatment necessary. Choose between two finishes – oil and lacquer – bringing out different qualities in the wood to give them a distinct look. All of our lacquers and oils meet strict international emission norms, so you can enjoy your wood flooring knowing that it was made with respect for the environment.

Extra matt lacquer

Our extra matt lacquer offers the best of both worlds: the look of untreated wood with the performance and low-maintenance of lacquer.

Lacquer

Lacquer makes the floor dirt-repellent, easy to clean, and resistant against water as well as household chemicals. Our lacquer comes in different gloss levels - bright, satin and matt lacquer.

High-quality oil

Oil really puts emphasis on the authenticity of real wood and gives it an extra matt look that ages gracefully and is easy to repair and renew.

Bevels

Bevels define each individual plank, creating the feeling of an authentic wood floor. Our collection features designs with bevels on the longest sides or on all four sides of the plank.

2-way bevel

4-way bevel

Woodspecies

Oak planks have a typical grain structure and a yellow to brown colour.

Iroko planks have a golden colour, with brown straight grain.

Merbau varies widely from orange towards dark reddish brown.

Walnut has a warm brown colour which contrasts with the whitish sapwood.

Wood is a living material. The colour will change naturally over the years. The illustrated patterns and colours are not a full overview of all the different nuances that can appear in a wood floor.

WOOD PARQUET

Pergo wood floors are built as they should be: to last. After all, floors need to withstand quite a lot. Children, accidents and parties are all part of life – which is why Pergo floors are designed with them in mind.

1 Protective finish

7 layers of high quality lacquer or 2 layers of high quality oil provide maximum protection and ensure easy maintenance.

2 Face layer

A carefully selected wood layer, 3.2 mm, that can be sanded 2 – 3 times.

3 Advanced core

The core absorbs the stresses and strains that are put on your floor, and ensures that it remains stable in all conditions.

4 Balanced backing

The backing veneer is made from ecologically certified wood and helps to perfectly balance the boards.

Pergo wood floors consist of 3 layers of wood with the grain running in different directions to reduce the natural swelling and shrinking caused by fluctuations in temperature and humidity. An advanced core of spruce absorbs stress and strain to ensure that your floor remains stable in all conditions.

ORIGINAL LAMINATE

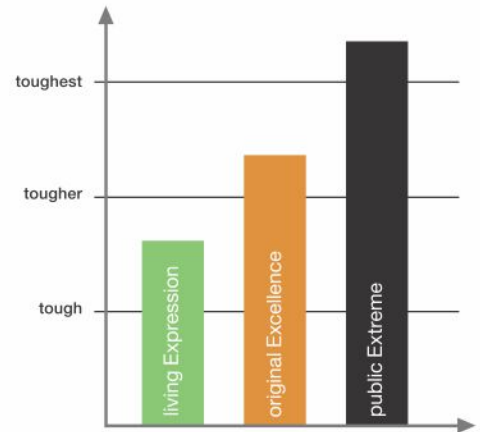

Ever wondered what laminate is and what makes Pergo special? Get into the details here!

The durable choice

Laminate flooring is the perfect combination of design and durability. Thanks to the patented **TitanX™ surface protection**, a Pergo laminate floor will keep its elegant finish year in and year out. TitanX™ is a multilayer technology that includes **protective layers** of aluminium oxide particles, which provides superior resistance to wear and scratching. And with the special **impact layers**, combined with a **high-quality core** material, TitanX™ also provides very high resistance to dropped objects and high-heeled shoes.

- 1 Superior wear and scratch-resistance layer
- 2 Crystal-clear decor
- 3 Excellent impact-resistance
- 4 Moisture-resistant HDF core
- 5 Back stabiliser

Why choose a Pergo floor!

Wear protection

Pergo's patented TitanX™ surface is the best multilayer protective floor finish on the market, providing wear resistance that exceeds normal standards for commercial environments.

Easy installation

Pergo's patented PerfectFold™ 3.0 installation system makes installation faster and easier because you can simply fold the floor into place.

Scratch resistance

The TitanX™ surface has an extra protective layer providing the best scratch and scuff resistance in the market, so your Pergo floor will retain its lustre much longer than other laminate floors.

Water resistance

Pergo's Moisture Resistance System combines moisture resistant core materials with a strong and tight click joint. The result is a product, which is amongst some of the most moisture-resistant floors in the market.

Impact resistance

The unique multilayer construction of our TitanX™ surface together with a dense core material provides very high impact resistance for handling dropped objects and high heels.

High fire resistance

A Pergo floor with TitanX™ surface has a natural high resistance to fire, thanks to its multilayer construction. This, in combination with the core's density allows for faster heat dissipation.

Easier cleaning

A Pergo floor with TitanX™ surface is much easier to clean than ordinary floors. The reason is that the TitanX™ surface is so tightly sealed that dirt simply cannot settle in.

Anti-static

Pergo laminate floors eliminate static electricity. Electrostatic charges generated by Pergo laminate floors are generally very low, but to reduce them even more we have developed a technology to give selected floors permanent antistatic properties throughout the life of the floor.

Hygienic

A Pergo laminate floor makes it easier to maintain a high level of hygiene. Bacteria require nourishment and moisture in order to thrive and the tightly sealed, easy to clean TitanX™ surface makes this impossible. This provides a high level of hygiene naturally, without chemical antiseptics.

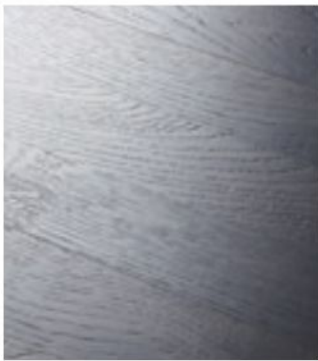

ORIGINAL LAMINATE

Beauty beyond looks

There is more to a beautiful floor than meets the eye. That is why Pergo laminate floors not only look authentic, they feel that way too. Our collections feature seven different surface textures that each serve to enhance the authentic impression of your laminate floor.

From the well-worn vintage look to the natural feeling of woodgrain. To allow more fine-tuning of your interior design, our collection also includes different levels of gloss and floors with or without bevels.

Bevels help define each plank, and the shadows they create give your floor an added dimension. To find out what you like, visit your nearest dealer to experience these different options first-hand!

Genuine™ wood, **GW**

A subtle wood structure that follows the wood grain in every detail, an effect that is even more prominent in our Sensation floors. Available in different gloss levels.

Genuine™ rustic, **GR**

A pronounced wood structure that follows the wood grain in every detail, which is highlighted even more in Pergo Sensation floors. Can have cracks, nubs and scraped effects.

Genuine™ sawcut, **GC**

Realistic wood structure with a saw effect.

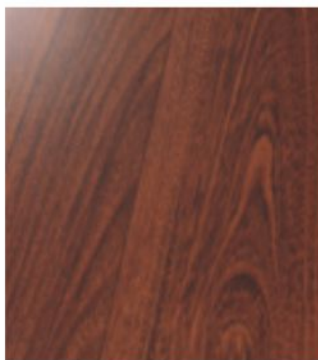

Genuine™ stone, **GS**

A life-like impression that follows the structure of real stone tiles.

Wood, **WO**

A fine and realistic wood texture, which highlights any kind of wood decor from light to dark wood species. Available in different gloss levels.

Smooth, **SO**

A silky, smooth surface for a softer touch and modern look. Available in different gloss levels.

Antique wood, **AW**

A rustic texture with a vintage feeling.

sensation

Irresistibly **water-resistant**

Pergo Sensation takes laminate flooring to a whole new level – even when it comes to water resistance. No more worrying about getting water on the floor, here is the perfect alternative for kitchens, bathrooms or hallways!

The new Pergo Sensation floors are not only designed to look great, they are also innovative when it comes to performance. With the brand new AquaSafe technology your new laminate floor is now protected against water like never before!

The surface protection of our new Sensation floors extends all the way into the bevels to create a fully closed surface. In addition, a water repellent coating on the plank edges ensures that water cannot penetrate the floor. Being water-resistant, a Sensation floor is also hygienic. Dirt – just like water – simply stays on the surface and can be wiped away easily. So it's safe to say that in terms of design as well as performance, the new Pergo floors are nothing short of a sensation!

Fast & easy installation with PerfectFold™ click system

Use the method that works best for you!

Drop down

The ideal method for quickly installing a large area. Click the plank at the long side joint, slide it until it meets the end of the previously installed plank, and press down.

Insert horizontally

Unlike many other brands, Pergo laminate floors can also be inserted horizontally. A very handy option for places where it is difficult or impossible to tilt the planks (when installing the last row of planks, or under door frames and radiators).

Angle

If you prefer, Pergo offers a third option for installing your new laminate floor. Simply angle and click the planks together at the short end.

Your floor is just a click away

Note- *Versailles, Vibrance and Domestic Extra Uniclic comes with the Uniclic system offering two different installation methods: Angle & Insert horizontally. **Classic Plank 4V can not be horizontally inserted on the long side. *** Universal Range comes with Smart Lock.

INCIZO  [®]
PATENTED TECHNOLOGY

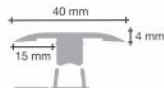

PGINCP(-)
2150 x 13 x 48 mm
(see matching matrix for correct art no.)

5 perfect finishes in 1

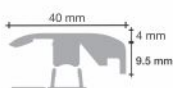

Pergo 5-in-1 offers different moulding solutions for different parts of your floor, all wrapped up in one handy package. The mouldings match your floor perfectly in colour as well as in texture, and the all-in-one solutions provide a seamless result. The surface is a wear and scratch-resistant laminate. The core consists of HDF and the bottom is made of plastic. With the patented Incizo[®] solution, you can simply cut the moulding to the shape you need. Suitable for flooring heights between 7 and 10 mm.

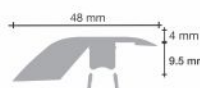

T-moulding
From laminate to laminate

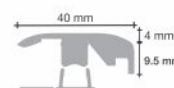

Carpet transition
From laminate to carpet

Hard surface reducer
From laminate to ceramic, vinyl or linoleum

End moulding
Finishing up to threshold, sliding doors, etc

Stair nose moulding, flush
For a flush finish on stair treads

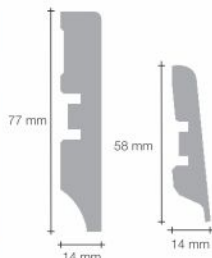

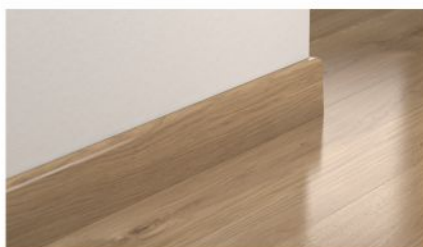

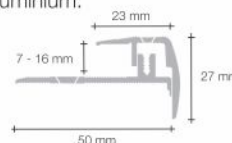

Stair nose moulding
For a step down from a floating floor, e.g. at the top of the stairs or a step down in a room

The Incizo[®] subprofile is required for stair application and has to be ordered separately.
NEINCPBASE (on request)

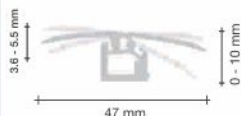

Stair nose aluminium (on request)
Fits to flooring thickness of 7 - 16 mm, W = 23 mm, L = 2.7 m.
PGSTPSILV, silver.
Surface: aluminium.

Wallbase, straight
PGSKR(-), 2400 x 14 x 58 mm
PGPSKR(-), 2400 x 14 x 77 mm (on request)
See matching matrix for correct art no.

Colour matched.
Surface: wear and scratch-resistant laminate.
Core: MDF.

Combi moulding, aluminium (on request)
PGPRSILV, silver

T-moulding and reducer in one. Plastic bottom rail.
Suitable for height differences of 0 - 12.3 mm.
1860 x 47 mm, H: 10 mm (uninstalled).
Colour: silver. Surface: aluminium.

End moulding, aluminium (on request)
PGENPSILV, silver

Fits to flooring thickness of 6 - 10 mm.
2700 x 25 mm.
Colour: silver. Surface: aluminium.

Aqua accessories

For wet area use with Pergo Sensation floors

Aqua Sealant

PGKITTRANSP
310 ml. A high-quality, transparent and elastic one-component silicone that creates an invisible and waterproof finishing around wallbases, mouldings, transitions, door frames, etc.

Foamstrip

NEFOAMSTRIP20
20 m x 10 mm. PE foam expansion joint filler. Serves as an elastic filler of all dilatation gaps around the floor perimeter. Requires sealing with Aqua Sealant.

Maintenance

The tightly sealed TitanX™ surface prevents dirt from taking hold, making Pergo laminate floors easy to clean. Our high-quality, ergonomically designed original maintenance accessories make it even easier to keep your floor looking fresh for longer. To maintain the lustre of a Pergo floor, avoid using regular cleaning products such as soaps and detergents as these will form a film on the surface. Pergo's special all round cleaner removes dirt without leaving a film if used correctly.

All round Floor Cleaner
PGCLEANALL1000

Specially developed for cleaning laminate, wood and vinyl flooring. Ideal for removing dirt, grease spots and heel marks, as well as for daily cleaning.

Repair wax
PGREPAIR

Repair the colour of damaged planks quickly and easily with wax in colours covering the Pergo wood palette. Contains 1 melting knife, 1 comb, 7 wax blocks. For more information on how to mix colours please visit pergo.com
